200BL3

*Weight is for machine only.

Full Digital and Portable. Perfectly Suited for Mobile Welding.

Easy to Use for Mobile Welding

- Only 9 kg despite all metal strong case.
- Input voltage from 200 to 240 V (170 to 264 V) for stable welding.
- Additional DC Stick welding control with arc drive function (arc force control) and voltage reduction device.

Welding Processes and Functions for Stable Welding Quality

Full Digital control allows easy setting, storage and recall of welding parameters.

- DC pulse welding.
- Arc spot welding.
- Memory to store/recall up to 9 sets of welding parameters.

Easy Setting

Full Digital control allows precise and easy parameter setting.

Large Jog Dial and Three Buttons on Control Panel
